Upon completion of this course, the student will be able to:

- Identify filler metals by their AWS classifications
- Show an understanding and application of gasses in welding procedures.
- Show understanding of base metals and filler metals by choosing the correct filler metal for certain basic applications
- Understand and describe electrical concepts applicable to procedures used.
- Demonstrate knowledge of welding accessories
- Demonstrate knowledge of welding safety equipment and clothing
- Understand and use basic welding terminology
- Describe general weld joint configurations
- Describe rod angles & rod manipulation techniques
- Understand the Heat Affected Zone and accompanying characteristics
- Understand problems encountered during the welding process
- Discuss applicable techniques to resolve problems encountered during the welding process
- Familiarization with codes and standards used for acceptance criteria.

**Student Assessment Methods:**

Students will be assessed by class participation, quizzes and exams.

**Use of Instructional Technology:** (includes software, interactive video and other instructional technologies):

The instructors will use texts, overheads, videos, or appropriate updated *DI.1 Structural Welding Code – Steel* code book

**Additional Special Information:** (special fees, directives on hazardous materials, etc.)

**Transfer Information:** (Please list colleges/majors that accept this course in transfer.)

**Course Outline Revision History:**

Last revised May 2005. Course title changed from Into to Welding Processes II.
