

## **Policy 2.8.4 Dress Policy**

Reviewed and Revised September 2014

The College has established regulations on appropriate dress to prevent accidents due to the potential hazards involved with some of the college's technical programs. Students should refer to their specific program policies concerning dress requirements which may be in addition to the requirements listed below.

All students reporting to the college or college grounds must wear shoes and a shirt at all times. This includes all off campus sites such as the carpentry house, maintenance mechanics building, masonry projects, etc. Coveralls, shop coats and other clothing worn over street clothes in areas of training subject to dust, grease, etc. are to be removed when entering the cafeteria, Learning Center, student commons area or Student Services areas.

### Rings

Rings and other jewelry are not to be worn in any shop/lab areas because of the danger of injury.

### Safety Glasses

Minnesota state law provides that every person shall wear industrial quality eye protection devices when participating in hazardous training activities while in school programs. The College will comply with the law by requiring that all students in trade and industrial programs purchase and wear industrial quality safety glasses with a side shield that meet ANSI Z87.1 requirements.

### Safety Shoes

Students are required to wear leather boots or protective footwear (safety shoes) that meet ANSI Z41.1 requirements during the time they are in shops, labs, or areas where foot injuries could occur. Tennis shoes or sneakers are not allowed. This requirement applies to students who are enrolled in career and technical programs.
