Mesabi Range Community & Technical College will host its 4th annual STEM (Science, Technology, Engineering, and Math) Camp the week of July 11th-15th. Students entering grades 7-10 in Fall 2011 can spend an exciting week exploring natural disasters and experience how STEM professionals forecast and report weather events, engineer structures to withstand extreme weather, and respond in emergency situations.

Each year, STEM Camp provides an opportunity for students to investigate STEM careers through interactive and fun activities in a college environment. Camp costs are supplemented by a grant from the Minnesota Center for Engineering and Manufacturing Excellence (MNCEME).

STEM Camp activities this summer will include tackling an engineering project with the Iron Range Engineering college students, practicing with fire extinguishers and learning first aid techniques with EMT and HazMat Teams, learning the science behind weather and playing with a tornado simulator with a National Weather Service meteorologist, taking a field trip to Duluth to stage a weather segment at WDIO with Justin Liles, and much more! STEM Camp will be a fun, educational, and active week for students!

All students entering grades 7-10 are welcome! Be sure to register your student by June 24th for this great opportunity!

Camp Dates: July 11-15
Cost: $100
Time: 8:30am – 3:00pm
Location: Mesabi Range Community & Technical College – Virginia Campus

To register your student (grades 7-10) for STEM Camp or for more information call 218-742-3438.
