**Course Purpose Code:**

- 0 – Developmental Courses
- 1 – Non-transferable, General Education
- 2 – Technical course related to career programs
- 3 – College course which has the primary goal of applying certain concepts (e.g. vocal ensemble)
- 4 – Other college course not considered a part of general education (MNTC) e.g. computer science, health, physical education
- 5 – Course which is intended to fulfill the Minnesota Transfer Curriculum (MNTC) requirements.
- 9 – Continuing Education/Customized Training specialized credit course (not occurring in 0-5)

**Catalog Description:**
This is a course designed to give pre-service elementary teachers the opportunity to develop a clear understanding of the mathematical concepts, procedures, and processes they will be called on to teach. The course will have a balance between what to teach (content and concepts), and how to teach (processes and communication). Each student will be required to present a math lesson to the class. The use of manipulatives will be demonstrated.

**Prerequisites and/or recommended entry skills/knowledge:**
- Course Prerequisite(s): Math 0093 (Beginning Algebra) or appropriate placement test score
- Reading Prerequisite:
- Composition Prerequisite:
- Mathematics Prerequisite:

**Career Programs and Transfer Majors Accessing this Course:**
This is a course designed just for elementary education majors. It is modeled after UMD’s Math 1141 to allow for a two plus two agreement for elementary education majors.

**Minnesota Transfer Curriculum Goal(s) partially met by this course if applicable:**

- 0. None
- 1. Communications
- 2. Critical Thinking
- 3. Natural Sciences
- 4. Mathematical/Logical Reasoning
- 5. History and the Social and Behavioral Sciences
- 6. The Humanities and Fine Arts
- 7. Human Diversity
- 8. Global Perspectives
- 9. Ethical and Civic Responsibility
- 10. People and the Environment

**Learning outcomes, including any relevant competencies listed in the Minnesota Transfer Curriculum:**
The student will be able to:
1. Problem solve using several standard strategies
2. Explain sets, whole numbers, and numeration systems
3. Use all four operations and all seven properties for whole number arithmetic, fraction arithmetic, decimal arithmetic, integer arithmetic, and real number arithmetic
4. Use proportional reasoning
5. Demonstrate beginning Geometry ideas
6. Explain approximation techniques and calculator use
7. Calculate probability for events

Student assessment methods:
Students will be assessed through a variety of methods including quizzes, tests, graded homework, and a presentation to the class.

Use of instructional technology (includes software, interactive video and other instructional technologies):
Calculators in the classroom will be studied. Various math soft wares will be demonstrated.

Outline of the major course content:
1. Introduction to problem solving
2. Sets, whole numbers, and numeration
3. Whole numbers, operations and properties
4. Fractions, operations and properties
5. Decimals, operations and properties
6. Integers, operations and properties
7. Proportional reasoning
8. Probability
9. Introduction to Geometry
10. Teaching techniques including manipulatives for these topics.

Additional special information (special fees, directives on hazardous materials, etc.)

Transfer Information: (Please list colleges/majors that accept this course in transfer.)
We hope to have the following schools accept this course since they have very similar ones in their catalogs: UMD, St. Scholastica, Bemidji, Hibbing Community College, and Lake Superior Community College. This course would only be used for elementary education majors.
