PRESS RELEASE

Mesabi Range College Announces Recipients of the Workforce Development Scholarships

Mesabi Range College is proud to announce the recipients of the Workforce Development Scholarships for new students enrolling in the Electrical Controls and Maintenance program Fall Semester 2018. ECM is a two-year technical program devoted to “hands-on” skills training preparing graduates for a career in a high demand field.

Kasey Dreke, John Jauhola, Paul Robison and Jerry Ray will each receive a $2,500.00 scholarship for the upcoming academic year. The Electrical Controls and Maintenance program provides training in the areas of electrical maintenance, industrial electronics, process control, instrumentation, fluid power, electrical-mechanical systems, and integrated computer control.

At Mesabi Range College, we advance the competitiveness of Minnesota's workforce by providing students with both the foundational skills and the technical skills needed to succeed. Eighty seven percent of Minnesota State graduates find a job related to their field of study within one year of graduation.

Initially funded by a $1 million appropriation from the 2017 session of the Minnesota Legislature, the Workforce Development Scholarships benefits new students enrolling in a Fall 2018 program at any Minnesota State college in associate degree, diploma, or certificate that prepare graduates for careers in high demand sectors.
